1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach the serving tray including inter alia, the extension of the center panel having a beverage opening, a beverage support panel hingedly attached at each end to an end of each of the first and second beverage support arms with the other end of each of the first and second beverage support arms is hingedly attached to said extension. The closest prior art, Lim (US4981217), as best shown in figure 2, teaches a serving tray including inter alia, an extension (44) with beverage opening (46) and a beverage support panel (portion of 70 that is horizontal), first and second arms (portion of 70 extend upwardly on each side). The intersection of the horizontal portion of (70) with the vertical portions (considered to be applicant's first and second arms) are hingedly attached as portion (70) is folded from the blank of figure 1. The first arm is hingedly attached (72) to the extension (44), but the second arm is attached to the extension by tab (76) and slot (78). Therefore the tab and slot connection is not "hingedly attached" as there is no structure allowing pivoting about an axis. While the material of the Lim allows for flexing or bending, this is not considered to be a hinge without some structure to allow for pivoting at a particular location, for example a fold line.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
